

Forms

[Fit and proper person disclosure and consent for inspecting organisations and specialist certifiers \(FP01\)](#)

This form is used to support a new application for appointment as a:

- warrant of fitness inspecting organisation (IO)
- certificate of fitness IO
- new light entry vehicle inspector (VI) (also known as a new light entry certifier)
- heavy vehicle specialist certification: local manufacturer IO.

Version: July 2024

[Apply to sit certifiers exam \(HVSC01\)](#)

Apply to sit heavy vehicle specialist certifier (engineer) exams run by NZTA, before applying to become an engineering heavy vehicle inspecting organisation/vehicle inspector.

Version: July 2024

[Heavy vehicle inspecting organisation/vehicle inspector Engineer's application \(HVSC02\)](#)

Heavy vehicle specialist engineers are capable of producing relevant engineering designs along with overseeing the manufacture and installation of components and modifications, and in some cases certify heavy vehicle static roll threshold and swept path.

Version: March 2025

[Local manufacturer vehicle inspector application \(HVSC04\)](#)

A local manufacturer (VI) may certify the manufacture and installation of components using an SODC or, where appropriate, standards or pre-approved designs for the aspects that they hold the appropriate categories for.

Version: July 2024

[Local manufacturer inspecting organisation application \(HVSC05\)](#)

A local manufacturer inspecting organisation (IO) cannot independently issue the certification but provides the infrastructure to allow a local manufacturer vehicle inspector (VI) to certify vehicle components from manufacture through to installation.

Version: July 2024
