1-8 Inspection

Every vehicle presented for an MR2A registration form, other than an approved new vehicle, must be inspected to verify that it complies with applicable requirements.

The inspection of the vehicle must be carried out according to the requirements set out for vehicle components or component groups in this manual. An approved checksheet must be used to record the details of the inspection carried out on each vehicle. This checksheet is used to record the necessary information against each item as it is inspected. The result of the inspection must be recorded on the checksheet. It must be signed by the certifier and filed in such a way that it can be retrieved by specifying the VIN. The certifier must complete a vehicle compliance certificate (LT4085) for the vehicle. If the vehicle passes the inspection, an MR2A registration form may be issued.
