3-11 Repairer register

A repair certifier must create and maintain a repairer register of all repairers of vehicles inspected and certified by that repair certifier. The register must include all types of repairer including any person to whom a task is delegated, approved technicians, wheel alignment and auto-electrical services.

The register must contain a profile, including:

- company name and address
- details of facilities at its premises
- details of specialist equipment
- manufacturer approval(s)
- trade association membership(s)
- relevant qualifications of employees who carry out repairs
- evidence of compliance with relevant trade or safety standards
- evidence of technical expertise for any delegated tasks
- details of delegated tasks (if any).

The repair certifier should refer to [Technical bulletin 8: Repairer categories, capabilities and requirements](#) for guidance on repairer, repair technician, premises, and equipment requirements.
