

VPN certificate update on 30 November 2024

We're replacing VPN certificates at the end of the day on 30 November 2024.

The next time you log into the VPN after the change, you'll see a pop-up window warning you about the new certificate.

Click **Yes** to continue connecting to the VPN. You only need to do this once.

If you have problems connecting to the VPN, check if the pop-up window is hiding in the background behind your other windows.
