

## New look and feel for Vehicle Inspection Portal

The new portal will be mobile and tablet friendly and have new features including:

- 'sticky tabs' so you always know where you are on a page
- a 'back to top' button so you don't have to scroll as much
- popup reminders when there's been an amendment (or the latest *Inspection news* is out).

You don't need to worry about finding your way around – the content itself hasn't changed and will be in the same order as before. Also, none of the links have changed, so any bookmarks or favourites will still work the same.

We've created a short guide to help you through the changes which you can download below.
