

Takata Alpha airbags compulsory recall - help for vehicle owners

This week we're sending out a pack to all WoF inspectors containing info and resources about the Takata Alpha airbags compulsory recall. Please read the letter and help us inform owners whose vehicles are under this recall.

As well as a letter, there's a poster to display, flyers to provide to affected owners and a reminder card (listing affected makes, and where to look up plates) to put on your computer monitor (you can download the flyer and poster below, but we will be sending you printed copies with the letter).

At this time, vehicles should **not** be failed for a WoF because of this airbag recall, but that could change in future, so it's important that owners get airbags replaced.
