

Information pack for existing WoF IOs about how the CoF system changes will affect them

The Transport Agency has developed an information pack specifically for existing inspecting organisations (IOs) who only carry out WoF inspections. While many of you wish to continue carrying out WoF inspections only, the recent changes to the CoF system resulting from the Vehicle Licensing Reform (VLR) have had a flow-on effect on the WoF system.

The link below takes you to the information pack which explains in more detail how the CoF system changes affect existing WoF IOs from 1 November 2014.

More detailed information about the new fees will be published next week and will be linked from the above information pack.
