

In-service VIRM amendment effective 28 April 2014 (affects both WoF and CoF)

The is now available (view the preview pages to see the new text).

- [List of changes - WoF only](#)
- [List of changes - WoF and CoF.](#)

Overview of the changes

This general amendment covers the following changes:

- **Headlamps (WoF and CoF)**
 - clarify that a pair of headlamps may consist of a symmetric and an asymmetric headlamp
 - improve wording relating to pairs of headlamps requiring to be of approximately equal colour and intensity (this change will also be made for other relevant lamps).
- **Tyres and wheels (WoF and CoF)**
 - Prohibit car tyres on two-wheeled motorcycles
 - Add new combination to tyre interchangeability table (generally affects only heavy vehicles).
- **Fuel system (WoF and CoF)**
 - Clarify allowable corrosion and other damage around fuel tank mountings.
- **Heavy vehicle 5th wheel, ball coupling/socket for towing semi-trailer, king pin (CoF only)**
 - Clarify that a certification plate/label is only required for ball-type coupling
 - Advise that 5th wheel operator statements of compliance (NZTA 4085A forms) can be obtained from CoF providers
- **Load anchorages (CoF only)**
 - Clarify what additional modifications and repairs have to be certified.
- **PSV doors and doorways (CoF only)**
 - Clarify line of sight for power-operated door testing
 - Introduce Technical bulletin (CoF) 5 specifying the PSV power-operated door testing procedure.
