

In-service VIRM (WoF) withdrawn on 1 April 2014

From today, **1 April 2014** the In-service VIRM (WoF) will no longer be on the inspection portal. This means that you will now need to use the [In-service VIRM \(WoF and CoF\)](#). While this change will save us time and effort for duplicating the inspection information, it will have no effect on how you use the In-service VIRM. If you haven't already checked it out, the WoF and CoF VIRM has additional sections for the CoF vehicles, but you can easily ignore these if you are not a CoF inspector.

If you have set up the In-service VIRM (WoF) as a shortcut on your desktop for easy access, please delete it and replace with a shortcut to the [inspection portal home page](#) or the [In-service VIRM \(WoF and CoF\)](#). Both of these will display the news items which is important for keeping up-to-date with inspection news.

To find out how to set up a shortcut, please check out the [vehicle inspection portal user guide](#). Alternatively, if you have easy VIRM access through your Favourites folder, the user guide has information about that also.
