

Online vehicle inspector application form

From 19 May 2026, the certificate of fitness vehicle inspector application form, which is currently a PDF form, will be available as an online form. It has been added in to the existing online WoF vehicle inspector application form.

Benefits

The online form will make the application process easier. It allows applicants to submit the application directly, without needing to attach it to an email.

Instructions are all in the form, mandatory fields are clearly indicated, and applicants will receive a confirmation of receipt immediately after submitting.

Changes

The content and requirements in the form will stay the same, only the layout will change a bit.

The main difference is that applicants will need to complete the form in one go as it's not possible to save the form. After starting, applicants have approximately 2 hours to complete the application before timing out. This includes attaching all required documentation.

To help with the application, all requirements will be displayed upfront, at the start of the application process.

Initially, we'll accept both the PDF and online forms and will give industry a heads up before we switch to accepting the new online form only.

Where to find it

The online form is available at:

[Vehicle inspector application form \(WoF and CoF\)](#)

Support

Applicants can call our Contact Centre on 0800 108 809 for support.
