PRS: Low volume vehicle certification

Introduction

Objectives of vehicle certification

Vehicle certification is about ensuring that vehicles used on New Zealand's roads meet the roadworthiness requirements defined in New Zealand law – when they enter the fleet and throughout their on-road lives.

Objectives of the Performance Review System (PRS)

The goal of NZ Transport Agency Waka Kotahi (NZTA) is to improve transport for all New Zealanders by improving the integration, safety, responsiveness and sustainability of the transport system. To do this, everyone involved in vehicle certification must apply the requirements set out in law accurately and consistently. For certifiers, this means following the requirements specified in their Vehicle inspection requirements manual (VIRM) and other required documentation.

The PRS is a tool used by NZTA for all certifiers and is intended to:

- focus on issues important to road safety
- be open and transparent in reviewing the performance of certifiers
- provide a level playing field, as it applies equally to all certifiers
- be easy to understand and use
- allow certifiers to measure their own performance in exactly the same way as an NZTA Certification Officer during a review
- allow and encourage certifiers to identify problems and opportunities to improve so they can take early action on their own initiative
- identify certifiers who perform well so they can be given incentives to maintain their performance and look for ways of continuously improving it
- identify certifiers who perform poorly so they can be encouraged through more frequent reviews to improve their performance.

How the PRS works

The PRS clearly sets out:

- what is expected of certifiers
- the way NZTA will assess certifiers' performance against these expectations
- a scoring system that enables certifiers' performance to be measured.

The PRS is made up of two main parts:

1. General part	This identifies five general categories that are important for all types of certification work.
2. Technical part	The Technical part differs for each type of certification work. For example, modified production or disability adaptation.

The General part measures how well certifiers perform in complying with all legal requirements (including Transport Agency requirements) relating to vehicle certification. It does this by measuring performance in five categories:

1. Technical performance	Do certifiers identify vehicles and components correctly, make correct technical decisions and certify those vehicles and components correctly? Are they competent in all technical aspects of their certification work?
2. Administrative performance	Are certifiers competent in all administrative aspects of their certification work, including the proper use of documents and correct entry of information?
3. Resources	Do certifiers have the right resources for their certification work, eg the right facilities and equipment?
4. Management	Do certifiers properly manage the parts of their operations that support their certification work, eg do they make sure their equipment is properly maintained?
5. Performance improvement	Do certifiers actively identify problems and opportunities to improve and take advantage of them? Do they regularly review their own performance? Are they open to complaints?

Each category is made up of a number of elements that are relevant to the category. For example, the resources category is made up of the following elements:

- facilities
- technical equipment
- administration equipment
- technical information
- controlled certification documents
- certification staff.

In this manual each category has a scoring page associated with it which provides performance descriptions and corresponding scores for each element. Scores range from 0 to 3 and are allocated by matching a certifier's performance to the corresponding descriptions set out in the scoring pages.

The Technical part also has scoring pages. The scores from these feed into the General part to produce a total score.

Category → **1 Vehicle identification**

1-1 Vehicle identification

Requirements Scores

	Score			
	0	1	2	3
1.1.1 Correct technical decisions	<p>You do not thoroughly inspect all evidence of vehicle identification or correctly determine whether it complies with all NZTA requirements.</p> <p>The area of non-compliance is significant.</p> <p>For example:</p> <ul style="list-style-type: none"> a vehicle identification number has not been read from the VIN plate, or a vehicle's VIN or chassis number is missing, or has obviously been unlawfully affixed or tampered with. 	<p>You do not thoroughly inspect all evidence of vehicle identification or correctly determine whether it complies with all NZTA requirements.</p> <p>The area of non-compliance is somewhat important.</p> <p>For example:</p> <ul style="list-style-type: none"> a vehicle's VIN or chassis number is damaged or obscured beyond recognition. 	<p>You do not thoroughly inspect all evidence of vehicle identification or correctly determine whether it complies with all NZTA requirements.</p> <p>The area of non-compliance is minor.</p> <p>For example:</p> <ul style="list-style-type: none"> a vehicle's VIN or chassis number is damaged or obscured but still readable. 	<p>You thoroughly inspect all evidence of vehicle identification and correctly determine whether it complies with all NZTA requirements.</p>
1.1.2 Technical competence	<p>You demonstrate:</p> <ul style="list-style-type: none"> little or no competence in the technical aspects relating to vehicle identification. <p>This means there are gaps in your knowledge.</p>	<p>You demonstrate:</p> <ul style="list-style-type: none"> some competence in the technical aspects relating to vehicle identification. <p>This means there are some gaps in your knowledge.</p>	<p>You demonstrate:</p> <ul style="list-style-type: none"> adequate competence in the technical aspects relating to vehicle identification. <p>This means there are gaps in your knowledge.</p>	<p>You can demonstrate comprehensive competence in the technical aspects relating to vehicle identification, including their compliance with the relevant legislation.</p>

How the parts of the PRS fit together

How NZTA Certification Officers will use the PRS

During performance reviews, our Certification Officers will observe you at work. Reviewers will compare your performance with the descriptions on the PRS scoring sheets, and will score you accordingly. These scores will be combined into an overall PRS score.

We will tell you the result for each area reviewed, and you will be able to use your PRS manual to see how the score was calculated.

There are no hidden measurement or scoring systems. Reviewers are encouraged to help you understand how the system works and how it can be used to help continuous improvement. Success for NZTA will be measured in higher performance scores – not in greater numbers of faults detected.

Use the PRS to improve your performance

We encourage certifiers to use the PRS regularly to assess their own performance and to identify problems and opportunities to improve. Internal Performance Assessment, Improvement and Training records are contained in the Master Records list.

LVV certifiers will be reviewed at least once every three years to give all parties confidence that they are meeting the performance requirements.

We encourage certifiers to use the PRS regularly to review their own performance, and to identify problems and opportunities to improve. This section is called [Measuring your performance](#), and the scoring guidelines section explains how this is done.

Benefits of good performance

NZTA will reward good performance scores by reducing the frequency of planned review visits. It will also reduce the disruption to your business caused by reviews (ie the better your scores, the fewer reviews you have).

Penalties for poor performance

Poor performance scores will reduce the confidence NZTA has in you as a certifier. Such scores will mean more planned review visits so that your performance can be more closely monitored (see PRS Scores and actions table in the Measuring your performance section). Poor performance scores will increase the cost to you in planned review fees and the disruption to your business caused by reviews. We hope this will encourage you to use the results of the PRS to improve your performance.

Enforcement action

The PRS is a powerful tool to enable NZTA to identify persistently poor performers. We are confident that most certifiers will respond positively to the PRS approach and use it to help improve their performance. When certifiers fail to respond positively and continue to perform poorly, this will be identified by PRS reviews. In these cases, NZTA will focus its enforcement and investigation resources on obtaining evidence of poor performance.

The final sanction

Clear evidence of persistently unacceptable performance will lead to disciplinary action. If certifiers fail to respond to warnings and suspension action, evidence gained during reviews will be used to support the case for withdrawal of their authorisation.

Road safety and the maintenance of a fair vehicle certification system demand firm and decisive action by NZTA. When certifiers fail to carry out their responsibilities NZTA will act to remove their authorisation. This will be done in a fair and reasonable manner and decisions will be open to appeal.

Working together in partnership

NZTA aims to work together with certifiers openly and transparently to achieve our joint goals of high standards of certification, leading to an improvement in road safety.

Definitions and abbreviations

Adjusted score	Means the total score that has been adjusted to take into account element scores of 1+ or less, ie where there is poor performance in some areas.
Category	These are the different areas that make up inspection and certification work. There are five categories which are weighted depending on their importance: Technical performance, Administrative performance, Resources, Management and Performance improvement. The five categories make up the General part of the PRS from which a score is derived.
Certifier	Means a vehicle inspector and/or inspecting organisation, depending on the context, and includes a specialist certifier.
Computer system	Means the system where the certifier enters certification .
Controlled document	Means a document you must use and complete as part of your inspection and certification work, such as WoF labels, checksheets, certification plate documentation or certificates.
Description	Means the performance description for each element score against which the certifier's performance is assessed. There are four descriptions for each element, one each for the scores 0, 1, 2 and 3.
Element	Means a detailed area relating to inspection and certification work, and related elements are grouped together to make up a category.
Element score	Means the score that is assigned to an element.
External document	Means any document supplied by outside parties (eg from vehicle owner or manufacturer) that you rely on in your inspection and certification work, such as exemption notices.
General part	Means the main part of the PRS which consists of the five categories and from which the total score is calculated.
Inspection and certification document	Means a document you use as part of your certification work, such as a checksheet or certification label. It includes controlled, uncontrolled and external documents.
Mystery shopper exercise	Means the Transport Agency arranging for a vehicle with known faults to be presented for inspection to check that the certifier carries out the inspection correctly. The certifier does not know that the vehicle is part of a mystery shopper exercise. This give the Transport Agency information about how inspections are carried out between scheduled reviews.

PRS	Means the Performance Review System.
Random re-inspection	Means a reviewer visiting unannounced between reviews and re-inspecting a vehicle that the certifier has just certified. This gives the Transport Agency information about how the certifier is performing between reviews.
Requirements	Means Transport Agency requirements which are contained in the PRS manual, your VIRM, your agreement/contract with Transport Agency and other information issued by Transport Agency.
Review	Means an assessment of your performance as a certifier, and is usually scheduled in advance depending on the score you achieved at the previous review. Reviews are carried out by Transport Agency reviewers.
Score	This is the result of your review and gives an indication of how well you performed. The higher the score, the better your performance as a certifier.
Self-assessment	Means you assess your own performance using the same criteria as the Transport Agency reviewer does when he carries out a review. The PRS requires you to carry out regular self-assessments.
Technical part	Means the part of the PRS that relates directly to the technical aspects of the inspection and certification work, ie technical decisions, technical competence and inspection equipment. The Technical part scores are transferred to the General part before the total score is calculated.
Total score	This is the score that is calculated when all the element scores have been assigned and the category scores have been weighted, but before it has been adjusted for areas of poor performance.
Uncontrolled document	Any document you develop yourself as part of your inspection and certification work, such as design calculations or technical drawings.
VIRM	Means the <i>Vehicle inspection requirements manual</i> . There are different VIRMs, depending on the type of certification work, and each one has a corresponding PRS manual.
NZTA	Means NZ Transport Agency Waka Kotahi
Weighted category score	Means a category score that has been weighted to reflect its importance in the overall inspection and certification work relative to the other categories.

3 Resources

Requirements

	What NZTA expects of you	How NZTA will assess your performance
3.1	Facilities	
	<p>The facilities that you use:</p> <ul style="list-style-type: none"> comply with the facilities requirements specified in section 1.1 of the LVVTA Operating Requirements Schedule 	NZTA will inspect one or more of the facilities that you use.
3.2	Technical equipment	
	<p>You have, or have ready access to all technical equipment as required by section 1.2 of the LVVTA Operating Requirements Schedule</p> <p>The equipment is complete, up-to-date and in good condition.</p>	NZTA will inspect the technical equipment you use.
3.3	Administrative equipment	
	<p>Currently no special administration equipment is required by the LVV certifier.</p> <p>Do not score this section, it is not required.</p>	
3.4	Technical information	
	<p>You have, or have ready access to, all technical information required by NZTA and LVVTA, required by section 2 of the LVVTA Operating Requirements Schedule</p> <p>The information is complete, up-to-date and in good condition.</p>	NZTA will inspect your technical information.
3.5	Controlled certification documents	
	<p>You have available blanks of all current LVVTA forms and form-sets you must use and complete as part of your inspection and certification work.</p>	NZTA will inspect your forms and form-sets.

3.6

Certification staff

You are doing inspections and certification work and hold current and appropriate NZTA appointments for the certification work you carry out.

You hold current driver licences for the types of vehicle you are required to drive/operate.

You have current public liability and professional indemnity insurance.

NZTA will:

- talk to you
- observe you at work
- inspect your drivers licence
- inspect your insurance documentation.

---	--	---	--

4.4

Management of technical information

Your approach to managing your technical information is **inadequate**.

This means you make little or no effort to manage your technical information.

For example, some technical information may not have been updated for a considerable time.

Your approach to managing your technical information is **barely adequate**.

This means although you make some efforts to manage your technical information, you often do not:

- update technical information promptly when you receive updates from the LVVTA, or
- store technical information so you have easy access

OR

- you do not keep a **LVVTA amendment record** or **Technical information record** for this manual or **VIRM: In-service certification** up-to-date.

Your approach to managing your technical information is **adequate**.

This means you usually make some efforts to make sure your technical information is:

- updated promptly when you receive updates from the LVVTA, and
- stored so you have easy access.

However, you do not always:

- maintain your technical information in good condition, or
- keep your **LVVTA amendment record** or **Technical information record** for this manual or **VIRM: In-service certification** up-to-date.

Your approach to managing your technical information is **well coordinated**.

This means you consistently make sure your technical information is:

- updated promptly when you receive updates from the LVVTA, and
- stored so you have easy access, and
- maintained in good condition

You keep an up-to-date **LVVTA amendment record** and **Technical information record** for this manual and **VIRM: In-service certification**

4.5

Management of inspection and certification documents

<p>Your approach to managing your LVV certification documents is inadequate.</p> <ul style="list-style-type: none"> • • <p>OR</p> <p>You do not keep a Certification plate register.</p> <p>OR</p> <p>You do not file F001 and F005 forms in a</p>	<p>Your approach to managing your LVV certification documents is barely adequate.</p> <p>This means although you make some efforts to manage your LVV certification documents, you often do not:</p> <ul style="list-style-type: none"> • keep unaffixed LVV certification plates out of reach of the public, or • lock unaffixed LVV certification plates in a safe, locker, or strong cupboard or drawer outside business hours, or • file F001 and F005 forms so that they can be easily retrieved <p>OR</p> <p>You do not keep a Certification plate register.</p>	<p>Your approach to managing your LVV certification documents is adequate.</p> <p>This means you usually make sure that:</p> <ul style="list-style-type: none"> • unaffixed LVV certification plates are kept safe at all times and out of reach of the public, and • unaffixed LVV certification plates are locked in a safe, locker, or strong cupboard or drawer outside of business hours, and • all F001 and F005 forms are filed so that they can be easily retrieved. <p>However, you do not always keep your Certification plate register up-to-date.</p>	<p>Your approach to managing your LVV certification documents is well coordinated.</p> <p>This means you consistently make sure that:</p> <ul style="list-style-type: none"> • unaffixed LVV certification plates are always kept out of the reach of the public and, outside business hours, are locked in a safe, locker, or strong cupboard or drawer • all F001 and F005 are filed so that they can be easily retrieved. <p>You keep an up-to-date Certification plate register.</p>

5 Performance improvement

Requirements

What NZTA expects of you	How NZTA will assess your performance	
5.1	Commitment to continuous improvement	
	<ul style="list-style-type: none"> • You are committed to improving your LVV certification work. <p>This means that you actively:</p> <ul style="list-style-type: none"> • identify problems and opportunities to improve • assess the cause of problems and prioritise problems and opportunities • address problems and opportunities according to priorities and available resources. <p>You complete an Improvement record where you have scored a 1+ or less in any category at your last NZTA review.</p>	<p>NZTA will:</p> <ul style="list-style-type: none"> • assess your commitment to continuous improvement • inspect your PRS Improvement record or LVVTA Self-revision form to check that any problems or opportunities to improve identified during self-reviews are recorded and followed-up.
5.2	Regular self-reviews	
	<p>You regularly carry out self-reviews to assess how well you meet the NZTA and LVVTA expectations as set out in the performance review system.</p> <p>This means you carry out a self-assessment at least once a year and within two months before a scheduled NZTA review.</p> <p>You record each self-review by completing a PRS or an LVVTA Self-revision form, (a master copy is filed in your PRS records folder).</p> <p>You record any problems or opportunities to improve that you identify during your self-review in your LVVTA Self-revision form for follow-up.</p>	<p>NZTA will:</p> <ul style="list-style-type: none"> • inspect your or LVVTA Self-revision forms • inspect your LVVTA Self-revision form to check that any problems or opportunities to improve identified during self-reviews are followed-up.

<p>5.3</p>	<p>Correct handling of complaints</p>	
<p>You are open to complaints and regard them as opportunities to improve.</p> <p>This means you:</p> <ul style="list-style-type: none"> • handle complaints in accordance with LVV ORS requirements • keep a Complaints record , in which all written complaints that have not been able to be resolved at the time of the complaint, are recorded • record any problems or opportunities to improve that you identify in the investigation of complaints in your Training/Improvement records for follow-up. 	<p>NZTA will:</p> <ul style="list-style-type: none"> • inspect your Complaints record to check that any complaints against you, including any complaints raised with NZTA, have been recorded and handled in accordance with LVV ORS requirements • inspect your Improvement record to check that any problems or opportunities to improve identified in the investigation of complaints have been recorded for follow-up and addressed • inspect your Training record to check that any training opportunities that have been identified in the investigation of complaints have been recorded and addressed. 	
<p>5.4</p>	<p>Commitment to the Performance Review System</p>	
<p>You are committed to making the performance review system work for you. This means you:</p> <ul style="list-style-type: none"> • actively use the system for improving your LVV certification work • are open about your problems and achievements • fully co-operate during regular performance reviews. 	<p>NZTA will:</p> <ul style="list-style-type: none"> • talk to you • assess your level of co-operation during reviews. 	

Scores

Score

5.1	Commitment to continuous improvement		
<p>You show little or no commitment to improving your LVV certification work.</p> <p>This means you do not make efforts to assess the cause of problems and actively work towards resolving them. You are often not even aware of the problems you have.</p>	<p>You show some commitment to improving your LVV certification work.</p> <p>This means you:</p> <ul style="list-style-type: none"> • are aware of what causes some of the problems and what you need to do to address them, and • carry out occasional self-reviews to assess how well you meet the NZTA’s expectations <p>However, although you work around the problems, you regularly do not:</p> <ul style="list-style-type: none"> • identify them in your PRS Improvement record (where you have scored a 1+ or less in any category at your last NZTA review), or • work actively to address them properly. 	<p>You show an adequate level of commitment to improving your LVV certification work.</p> <p>This means you:</p> <ul style="list-style-type: none"> • actively identify and prioritise problems and opportunities to improve; and • assess the cause of problems and identify what you need to do to address them. <p>However, you do not always:</p> <ul style="list-style-type: none"> • address the problems and opportunities as promptly as you could, or • record all problems and opportunities in your PRS Improvement record and you complete an Improvement record where you have scored a 1+ or less at your last NZTA review. 	<ul style="list-style-type: none"> • You are fully committed to improving your LVV certification work. • This means you: • actively identify and prioritise problems and opportunities to improve; and • assess the cause of problems, and • address problems and opportunities according to available resources, and • record all problems and opportunities in your PRS Improvement record and you complete an Improvement record where you have scored a 1+ or less at your last NZTA review.

5.2

Regular self-reviews

You **do not regularly assess** how well you meet NZTA's expectations as set out in the performance review system.

This means there is no evidence of you carrying out self-reviews.

You **sometimes assess** how well you meet NZTA's expectations as set out in the performance review system.

This means you carry out some self-reviews but you do not:

- carry our self-reviews regularly (ie, at least once a year and before scheduled performance reviews), or
- record self-reviews on a LVVTA **Self-review form**.

You **regularly assess** how well you meet NZTA's expectations as set out in the performance review system.

This means you carry out self-reviews at least once a year (or more often as appropriate to the number of LVV certifications you do).

However, you do not always:

- carry out self-reviews before scheduled performance reviews, or
- record self-reviews on a LVVTA **Self-review form**, or
- record problems or opportunities to and follow up actions that you identify during self-reviews in your PRS **Improvement record** or LVVTA **Self-revision form**.

You **regularly assess** how well you meet NZTA's expectations as set out in the performance review system.

This means you:

- carry out self-reviews at least once a year (or more often as appropriate to the number of LVV certifications you do); and
- carry out self-reviews before scheduled performance reviews, and
- record each self-review in a PRS **Self-assessment record** or LVVTA **Self-revision form**, and
- record problems or opportunities and follow up actions in your PRS **Improvement record** or LVVTA **Self-review form**

5.3

Correct handling of complaints

<p>You show little or no commitment to making the performance review system work in and for your business.</p> <p>This means you do not:</p> <ul style="list-style-type: none"> • use the system for improving your L • share performance • discuss 	<p>You show some commitment to making the performance review system work in and for your business. There is little evidence that you make the performance review system work for your business by actively using it to improve your LVV certification work.</p> <p>This means:</p> <ul style="list-style-type: none"> • you make some efforts to use the system in your business, but mostly to satisfy NZTA, and • there is a basic level of co-operation during NZTA performance reviews but there is a reluctance to share problems with NZTA. 	<p>You show an adequate level of commitment to making the performance review system work in and for your business.</p> <p>This means you:</p> <ul style="list-style-type: none"> • actively use most aspects of the system for improving your LVV certification work, although you do not use the system to its full extent, and • show a good level of co-operation during NZTA performance reviews. <p>However, you are often reluctant to share problems with NZTA.</p>	<p>You are fully committed to making the performance review system work in and for your business.</p> <p>This means you:</p> <ul style="list-style-type: none"> • actively use the system for improving your LVV certification work, and • are open about your problems and achievements, and • fully co-operate during NZTA performance reviews.

Measuring your performance

As part of the Performance Review System (PRS), you are expected to regularly assess your own performance (also known as self-assessment). You can do this using the [electronic scoresheet](#) available in the [Master records](#) section.

This section explains how to carry out a self-assessment and how you can measure your performance and calculate your total PRS score. NZTA Certification Officers will use the same measures when they review you to see how well you meet NZTA expectations, as set out in this manual.

Purpose of self-assessments

When you carry out a self-assessment, your main purpose is to assess your performance against the descriptions in the General part and the Technical part of the PRS. This will enable you to identify and address any issues and improve the performance of your inspection work. It will also help you to achieve the highest score possible at your next review – and the higher your score, the less frequent the reviews.

When carrying out a self assessment, if you identify any areas where you need improvement (ie you score yourself less than 3), write it down on an [Improvement record](#) form along with what you will do to improve.

Overview of the self-assessment process

Before you do your first self-assessment, you should read these guidelines so you know how to score your performance. To help you understand the self-assessment process, the brief outline below shows you what is involved.

1. Print the [scoring sheet](#) PDF. It contains both the General Part and Technical Part scoring sheets. Alternatively, download you may use the [electronic scoring sheets](#).
2. Read the descriptions for each element in the Technical and General parts of the PRS and identify the ones that best match your performance. We recommend you work from right (score 3) to left (score 0).
3. Enter the corresponding element scores into the Technical and General part scoring sheets as you go, and write any comments and items for improvement into the comments fields.
4. Calculate the average element scores for the Technical part (one each for Correct technical decisions, Technical competence and Technical equipment) and transfer these to the General part scoring sheet.
5. If you wish, you can calculate the category scores and the total and adjusted total scores. These will give you some idea of how well you perform overall.

6. Transfer any issues identified during your self-assessment onto an Improvement record form. Make sure you address these issues as soon as possible and record your actions on this form.

7. If you wish, you may like to recalculate the total and adjusted scores, taking into account the improvements you have made, so you can see how much you have improved your performance.

What are the scores and what do they mean?

The PRS calculates four types of scores:

- element scores
- category scores
- total score
- adjusted score.

The performance review system is based on four major score values:

- 0** – performance is unacceptable
- 1** – performance is marginal and requires substantial improvement
- 2** – performance is adequate but there is room for improvement
- 3** – performance is consistently good and meets the required standard.

In the PRS, you will find four descriptions (one for each score) for each element covered in the PRS. Assess your performance against these descriptions, and score yourself according to the one that most closely represents your performance.

If a description does not fully describe your performance, you can vary the score with:

- a plus (+) to indicate that your performance is slightly better than the description, or
- a minus (–) to show that your performance is close, but does not quite match the description.

This table sets out all the possible element scores and their numerical values. The numerical values are used to calculate your total score.

Using the scoring process described in the following pages, you will arrive at a total score for your performance.

Element score	Numerical value		
0	0.0	Scoring process ----->	Total score eg 2.3
0+	0.3		
1-	0.7		
1	1.0		
1+	1.3		
2-	1.7		
2	2.0		
2+	2.3		
3-	2.7		
3	3.0		

How do I score myself?

The following guidelines explain how the total adjusted score is calculated and will allow you to understand the process. When you carry out your self-assessment, you may perform the calculations as shown or you may use the electronic scoresheets which are available on the Transport Agency website. These are easy to use and will automatically perform the calculations for you.

The performance review system (PRS) is divided into two parts. Your total score is determined by the General part. Scores from the Technical part feed into the General part.

For each part, you have a corresponding PRS [Self-assessment record](#).

You can start with either the General part or the Technical part when carrying out your self-assessments.

If you start with the Technical part, proceed as follows:

Self-assessment – Technical part

- Decide how you want to carry out the technical assessment. For example, you may choose to observe a certifier carrying out an inspection, or carry out an inspection yourself, or arrange for another inspector to observe your inspection (peer review) or re-inspect a vehicle or component after a certifier has completed an inspection.
- Choose what vehicle components you want to assess. Your PRS technical Self-assessment record has space for seven items because this is the number of items for which the Transport Agency reviewer will check your performance in the course of a regular review. The Transport Agency recommends that you do self-assessments on all items over a period of time.
- Based on the descriptions in the Technical part of the PRS manual, score your or your staff's performance for each element. Use the description that best fits your performance. Enter your scores in your PRS technical Self-assessment record.
- When you have completed the PRS technical Self-assessment record, calculate the average scores for each of these three elements:
 - Correct technical decisions

- Technical competence
- Technical equipment.

Do this by:

- finding the equivalent numerical value for each score (use the element score/numerical values table as outlined on the following page)
- adding together all the numerical values for each element, then
- dividing the total by the number of scores you have assessed.

Alternatively, fill out the electronic scoresheets which are available on the Transport Agency website.

For example, for ‘Correct technical decision’ you may have scored the following vehicle components and assigned the corresponding numerical values:

Item	Your scores for correct technical decisions	Your numerical values for correct technical decisions
1. Brakes	2	2.0
2. Steering	2+	2.3
3. Tyres, wheels and hubs	3-	2.7
4. Vehicle structure	2	2.0
5. Headlamps	2	2.0
6. Windscreen wash and wiper	2-	1.7
7. Mirrors	2	2
Total		14.7

Divide the total by the number of scores (7 in this case) to get your average Correct technical decision score:

$$14.7 \div 7 = 2.1$$

Follow the same process for Technical competence and Technical equipment.

Note that for some items no technical equipment is used, so no Technical equipment score can be allocated. In such cases, you would divide the total by the number of items you have assessed which can have a score.

When you come to fill in the PRS administration Self-assessment record, transfer these average scores into the appropriate sections:

Correct technical decisions: into section 1.2 of PRS administration Self-assessment record

Technical competence: into section 2.1 of PRS administration Self-assessment record

Technical equipment: into section 3.2 of PRS administration Self-assessment record

Self-assessment – General part

Based on the descriptions provided in the General part of the PRS, score your or your staff's performance for each element using the description that best fits your performance. Enter your scores in your PRS general Self-assessment record.

- When you have completed the PRS general Self-assessment record, calculate the average score for each of the five categories of the administration part: certification outcomes, competence, resources, management and performance improvements.

Do this by:

- finding the equivalent numerical value for each score (use the element score/numerical values table as outlined on page 2)
- adding together all the numerical values for each element, then
- dividing the total by the number of scores in that category.

For example, in the certification outcomes category, add together the numerical values of your scores for the four elements in that category:

- Correct certification outcomes
- Correct technical decisions (from Technical part)
- Correct use of certification documents
- Correct entry of certification information

Then add up the four numerical values for this category and divide this figure by four to get the average.

How do I calculate my total score?

Work out your total score using the average scores of the five categories of the administration part. When you calculate the total score, each of the averages is 'weighted' to reflect its relative importance.

Use the table below to work out your total score. In the left column, fill in the average numerical values from your scores in the five categories of the administration part.

Then calculate the weighted scores by multiplying the averages by the corresponding weights. The total of the weighted scores is your total score.

Note that the total weighted value is not necessarily your total adjusted score as a further adjustment may be applied to take account of any serious areas of weakness.

Category	Average numerical value of category	Weight	Weighted value of category
Technical performance		x 0.50 =	
Administrative performance		x 0.20 =	
Resources		x 0.10 =	
Management		x 0.10 =	
Performance improvement		x 0.10 =	
Total weighted value (add all weighted numerical values)			

For example:

Category	Average numerical value of category	Weight	Weighted value of category
Technical performance	2.4	x 0.50 =	1.2
Administrative performance	2.0	x 0.20 =	0.4
Resources	2.5	x 0.10 =	0.25
Management	2.0	x 0.10 =	0.2
Performance improvement	1.7	x 0.10 =	0.17
Total weighted value (add all weighted numerical values)			2.22

Your total score is the total weighted value rounded to the nearest decimal place. In the example, your total score, based on a total weighted value of 2.22, is 2.2 – a good score.

The electronic scoresheet

All scores may be entered in an electronic scoresheet which is available in the [Master records](#). This will calculate your total score automatically. It will also calculate an adjusted score which may be different from the total score.

How do I calculate my adjusted score?

Your total score can be adjusted downwards to reflect any major gaps in your knowledge or skills.

This is because the total score will be capped if there are any significant weaknesses in important areas. These are shown by scores of 1+ or less in any of the technical scores. The count of such scores can progressively limit the level of the total score you can achieve. Your total score adjusted by these limiters is your adjusted score.

The lowest score in the unweightd category scores may also affect the adjusted score.

These two factors, which may limit the total score to give an adjusted score, work as follows:

a) scores of 1+ or less scored for Technical decisions and Technical competence in the Technical part, and scores of 1+ or less in any of the administration part category scores (with the exception of Management). The higher the count of these scores, the lower the adjusted score will be. The following table illustrates their effect.

Count of scores equal to or below 1+	Maximum possible adjusted score
1	2.4
2	2.3
3	2.1
4	2.0
5	1.9
6	1.7
7	1.4
8	1.3
9	1.2
10	1.1
11	1.0

b) the lowest score in any category may downgrade the adjusted total further according to the following table.

Count of scores equal to or below 1+	Maximum possible adjusted score
1.0	1.5
1.1	1.6
1.2	1.7
1.3	1.8
1.4	1.9
1.5	2.0
1.6	2.1
1.7	2.2
1.8	2.3
1.9	2.4
2–2.69	2.9
2.7–3	No further adjustment made at this stage

The final consideration

The total adjusted scores will be used to determine how often you need to be reviewed. Consistently good total adjusted scores will mean fewer reviews (and lower costs) while consistently poor total adjusted scores will lead to more frequent reviews (and higher costs). Persistent low total adjusted scores will lead to some form of sanction.

Refer to the Scores and actions table on the next page for further details.

Total adjusted score (Note 1)	All category scores must be equal or higher than (Note 2)	Action/Result	Interval until next regular review	Comments
0.1 0.2 0.3 0.4 0.5 0.6 0.7 0.8 0.9	– – – – – – – – –	Suspension for up to six months Full review required after the suspension period.	–	The total score from the full review after the suspension period must improve to at least 1.5, with no category scoring less than 1.00. First regular review following reinstatement will be after 6 months
1.0 1.1 1.2 1.3 1.4	– – – – –	Follow-up review (full review) may be required within 2 months.	–	The total score from the follow-up review (full review) must improve to at least 1.5 with no category scoring less than 1.00. Otherwise, a suspension up to 6 months may apply.

Total adjusted score (Note 1)	All category scores must be equal or higher than (Note 2)	Action/Result	Interval until next regular review	Comments	
1.5 1.6 1.7 1.8 1.9 2.0	1.00 1.10 1.20 1.30 1.40 1.50	Follow-up may be required within 4 weeks for any element scored 1+ or less (Note 3).	6 months 7 months 8 months 9 months 10 months 12 months	If elements scoring 1+ or less do not improve to 2– or higher after the follow-up, the total score will be reduced by 0.2 points for each element not improved. If, after the total score reduction, the total score is still 1.5 or lower, any element still scoring 1+ or less may require a second follow-up within 2 months.	
2.1 2.2 2.3 2.4	1.60 1.70 1.80 1.90		13 months 15 months 16 months 17 months	If there are still elements scoring 1+ or less after the second follow-up, a full review may be required within 2 months. A score of 2.0 or less indicates that performance may not be adequate. A letter will be sent expressing the Transport Agency’s expectation that performance improve to at least 2.6 by the next review.	
2.5 2.6 2.7 2.8 2.9	2.00		–	18 months 19 months 20 months 22 months 23 months	In order to achieve a total score of 2.5 or higher, each element score, except for management category elements, must be 2– or higher. If any element score (except for management category elements) is below 2–, the actual total score cannot exceed 2.4.
3.0	2.70		–	24 months	In order to achieve a total score of 3.0, consistency must be demonstrated by a total score of 2.5 or higher in the last regular review. Otherwise the total score becomes 2.9.

Note 2

If there are category scores that are lower than the minima specified for a particular total score, the actual total score becomes the score that matches the lowest category score.

Note 3

'Follow-up' here means a progress check on remedial action taken by a certifier in respect of one or more elements where serious problems have been identified, either by way of:

- a reviewer visit focussing on the elements
- if possible, a certifier providing documentary evidence to a reviewer, eg by mailing or faxing a Training record.
