16-1 TSL

Mandatory requirement

1. The operator of a vehicle that requires a transport service licence (Table 16-1-1) has not notified (Note 2) the vehicle inspector of the transport service licence number under which the vehicle is operated.

Note 1

If correctly licensed, a vehicle requiring a transport service licence can be identified by the 'T' or 'L' on the vehicle licence label.

Note 2

Every vehicle that operates in a goods service or vehicle recovery service must display a TSL label that identifies the TSL number the vehicle is presently operated under (see Figure 16-1-1). For CoF purposes, the vehicle inspector must record the number on the TSL label. Where there is no TSL label, or for a rental vehicle, the KSDP is expected to make a reasonable effort to request the TSL number from the driver. The TSL number must be entered into the system when the inspection is recorded, but where a TSL number cannot be obtained, fault code VLP must be entered.
